

# Bowser

EXECUTIVE LINE

HO ALCo RS-3 Pennsylvania "Hammerhead" Locomotive  
 A classic locomotive. We measured the real locomotive at the  
 Rochester & Genesee Valley Railroad Museum, Otto Vondrak, President. .  
 At the museum the Hammerhead has the Conrail rebuild.  
 For a great day visit the Museum. Read the history of the loco at  
<https://www.rgvrrm.org/about/railroad/lv211/>

The Bowser model is as built for the PRR. HO scale, can motor, LED lighting, blackened nickel plated wheels, and many detail parts. Chassis the same as used in our recent release of Phase 3 locos.

DC Analog Version \$249.95 Sound/DCC Version \$349.95
