

PENN CENTRAL DeWITT RS3M

The DeWitt RS3m was a rebuild program performed in the early 1970s by the Penn Central's DeWitt shops in Syracuse, NY. These were dubbed with the nickname "DeWitt Geeps," as they were converted from standard ALCo RS3s to be equipped with EMD 567B prime movers and components recycled from surplus EMD E-units.

**Analog (DC) version features 21-pin plug for DCC,
